ENVIRONMENTAL PERFORMANCE

Past Accomplishments

CTC has demonstrated its commitment to environmental performance in the areas of reduced energy use and reduced solid waste. Since 1997, the facility has:

- **Reduced energy use** by 10.9% through a range of energy conservation measures including: an employee awareness program, a “lights-out” policy, purchase of energy efficient computers, and optimization of the automatic temperature control system and chiller plant operation.
- **Reduced solid waste** by increasing recycling 3-fold.

Future Commitments

CTC also committed to continued environmental improvement through reducing energy use, solid waste, and VOC emissions. By 2003, the facility will:

- **Reduce energy use** by 6% through expanding implementation of the energy conservation program.
- **Reduce solid waste** by increasing the recycling rate to 50% (by 2005).
- **Reduce VOC emissions** by 5% through replacing paints containing VOCs with environmentally-friendly materials where feasible or instituting technologies that minimize VOCs, such as low-watt density systems.
- **Reduce solid waste** 5% by implementing a recycling program.

COMMUNITY OUTREACH

CTC has a designated management system representative who receives and responds to all external inquiries. The facility issues press releases, posts releases on its website, and also holds an annual open
